NIKHIL KUMAR

Data Engineer | Cloud Engineer

Bengaluru, Karnataka, India | +91 7338657300 | Nikhil.nk0101@gmail.com

PROFESSIONAL SUMMARY

Data Engineer / Cloud Engineer with around 4 years of experience designing, building, and optimizing scalable data pipelines on Snowflake, Google Cloud Platform (GCP), and AWS. Skilled in Apache Airflow, Informatica IICS, Snowpark, Python, and SQL, with a focus on ETL automation, data quality, performance optimization, and enabling business intelligence and analytics.

TECHNICAL SKILLS

- **Programming Languages:** SQL, Python, C++
- **AI Fundamentals:** LLM, RAG, Agents, LangChain,LangGraph
- **Data Warehouses:** Snowflake, Google BigQuery, Amazon Redshift
- **Databases:** MySQL, MongoDB
- **Big Data & Distributed Computing:** Apache Spark, Apache Hadoop, Databricks
- **Streaming & Messaging:** Confluent Kafka, Google Pub/Sub, Amazon Kinesis
- **ETL & Orchestration:** Apache Airflow, Informatica Intelligent Cloud Services (IICS), AWS Glue, Azure Data Factory (ADF), AWS Step Functions
- **Google Cloud Platform (GCP):** Cloud Storage (GCS), Cloud Functions, BigQuery, Dataproc, Cloud Composer, Pub/Sub
- **Amazon Web Services (AWS):** S3, Lambda, DynamoDB, Redshift, Athena, Glue, SNS, Kinesis, Step Functions
- **Microsoft Azure:** Azure Data Factory, Azure Logic Apps, Azure Blob Storage, Azure DevOps
- **Tools & Other:** Snowpark, Streamlit, Git, Bitbucket, Jira, Confluence, Linux

PROFESSIONAL EXPERIENCE

Data Engineer Sep 2022 – Dec 2025

MathCo | Bengaluru, India

MDL – Marketing Data Lake | *Apache Airflow, REST APIs, GCP Cloud Storage, Snowflake*

- Built a data pipeline to extract campaign data from multiple social media platforms through REST APIs.
- Automated extraction, transformation, and loading workflows using Apache Airflow.
- Stored raw and processed data in Google Cloud Storage and loaded transformed data into Snowflake for reporting and analysis.
- Enabled scalable, automated, and reliable campaign performance tracking across platforms.

MDL Redesign | *Informatica IICS, Snowflake, Linux*

- Redesigned the campaign data pipeline to extract data from multiple social media platforms via APIs.
- Processed and transformed data using Informatica Intelligent Cloud Services (IICS), ensuring data quality and consistency.
- Loaded structured data into Snowflake for reporting and analysis; managed raw and unstructured data on the IICS Linux server.
- Delivered the project ahead of the deadline and received an appreciation award.

Data Quality Framework | *Streamlit, Snowflake Stored Procedures, Tasks*

- Developed an interactive data quality dashboard using Streamlit with Snowflake as the backend.
- Enabled technical and non-technical users to monitor daily data quality and manage generic and business rules.
- Automated data governance using Snowflake stored procedures, tables, and tasks.
- Received appreciation from the client and senior manager for accurate delivery.

Advance Data Engineer Jan 2026 – Present
Albertsons | Bengaluru, India

Digital Fulfillment-Albertsons (Advance data Engineer) | *SQL,Bigquery, Airflow, Stored Procedures, git*

- Built and maintained GCP data pipelines that stream eCommerce fulfillment data from Kafka into BigQuery.
- Developed BigQuery stored procedures that parse JSON payloads into refined FLAT tables.
- Loaded confirmed tables using SCD Type 2 logic with change detection, exception handling and audit logging.
- Delivered schema changes end to end, including DDL, views and rollback scripts, through YAML-driven deployments across Dev, QA and Prod

PERSONAL PROJECTS(AI)

- **Resume Matcher + Cover Letter Writer | Python, LangChain, Mistral AI, Streamlit**
  Built a 7-step AI workflow extracting structured profiles from resumes and job descriptions using Mistral with Pydantic schemas, computing semantic similarity via Mistral embeddings and cosine similarity for skill-gap analysis and match scoring.
  Auto-generates tailored cover letters and rewrites resume bullets with a guardrail that flags hallucinated numbers not found in the original resume or job description.

- **Travel Planner AI Agent | Python, Groq, Tavily, OpenWeather API, Streamlit**
  Built an autonomous ReAct agent where the LLM dynamically selects tools — Tavily web search, OpenWeather forecast, or Python budget calculator — across up to 12 reasoning steps.
  Implemented context trimming, exponential backoff retry, and a step-limit safety cap to produce weather-adjusted day-by-day travel plans within budget.

- **DocChat AI — RAG Pipeline | Python, LangChain, Mistral AI, Pinecone, Streamlit**
  Built a RAG pipeline ingesting PDFs or web URLs, chunking with RecursiveCharacterTextSplitter, and embedding into Pinecone using llama-text-embed-v2 via Pinecone inference API.
  Implemented a custom LangChain retriever fetching top-4 semantically relevant chunks to ground Mistral Large responses in source content, reducing hallucination.

EDUCATION

Bachelor of Engineering, Electronics and Communication Engineering 2018 – 2022
Siddaganga Institute of Technology, Tumakuru, Karnataka | CGPA: 7.4

ACHIEVEMENTS

- Received an appreciation award for completing the MDL Redesign project ahead of the deadline.
- Recognized by the client and senior manager for accurate delivery of the Data Quality Framework.
- Trained intern batches and mentored them through completing industry projects.
